TASK

Create a responsive webpage according to provided designs using bootstrap v4.6 framework and content-agnostic CSS concept.

Use HTML5 **semantic** elements.

Page should be responsive (mobile < 768px, tablet < 992px, desktop >= 992px).

Please, use Bootstrap v4.6 latest via CDN(<https://getbootstrap.com/>).

Note that many of bootstrap components require the use of JavaScript to function. Specifically, they require jQuery, Popper.js. The setup is described here:

<https://getbootstrap.com/docs/4.6/getting-started/introduction/>

All elements positioning and responsive view should be implemented with only bootstrap classes.
Custom css is allowed only for colors and fonts.
Please, use content-agnostic CSS concept when add a custom css classes.
Burger menu should work on tablet and mobile view.
All required images can be found in **assets** folder.

Colors, used in design:

Black: #111
Grey: #525252
white
coral
lightcoral

Font-family: 'Roboto'

RESTRICTIONS

- Do not use any **javascript**.
- Do not use any media tags and any custom rules for positioning elements
- No requirements for browser support (should correct work in Google Chrome last version)
- No need in pixel perfect.

BEFORE SUBMIT

- Read requirements and compare to your homework result
- Check responsive view
- Format the code (remove unnecessary lines of code)
- Remove all unnecessary files that you might have included by mistake
- Validate HTML(<https://validator.w3.org/>) and CSS (<https://jigsaw.w3.org/css-validator/>)

SUBMIT

- The folder should be uploaded to GitLab repository "**FL-16**" into **master** branch.
